

Parents, Teachers, and Students:

NASA's Commercial Crew Program is partnering with private companies to develop new spacecraft to fly astronauts on NASA missions to the International Space Station. We want kids to have a fun way to learn more about this program, while being creative!

The Commercial Crew Program is holding an artwork contest **Now through October 28, 2020** for children ages four to 12 years old. The winning artwork will be used to create a 2021 calendar, which has a different space-related theme for each month. The themes educate students about the International Space Station, astronauts, growing food in space, and more! Unique and original first and second place artwork will be selected for each month. The calendar will also include supplemental education materials for kids to learn more about the space-related themes.

Go to <https://go.nasa.gov/3jiZxG4> for more information about the competition's themes, rules, deadlines, and artwork form. Get your parent's permission, of course! After reviewing the NASA contest guidelines, submit your entry here: <https://contest.sciartexchange.org/NASA-crew-calendar-2021/>

Special thanks to [SciArt Exchange](#) for their help with this year's contest!

Share this contest with your friends and family on social media using **#NASA #CCPartContest!**

SPECIAL NOTE: Due to export control issues, the competition is open to all individuals, except those from a "Designated Country." The current list of "Designated Countries" can be found at: <https://www.nasa.gov/oii/export-control>.
