

In School Guidelines – Health Screenings

Parents are the first level of daily health checks. Parents are the most knowledgeable judge of their own child's health as COVID-19 has an incubation period in which symptoms may not be evident. Schools will have touchless thermometers available at each site for a second screening, when appropriate.

- Students and staff should take their own temperature before reporting to school each day and stay home if above 100F or if experiencing other symptoms.
- Teachers will have the option of using a touchless thermometer, following the guidelines established by the District, to screen students prior to entering the classroom.
- Schools will identify students not equally supported in a self-assessment at home and develop a plan to screen those students upon arrival at school.
- Students kept home by parents, or by school officials for health-related reasons will be considered excused.
- Students who are home for a designated period, but otherwise asymptomatic will be supported to continue learning at home.
- Students who are ill should prioritize their health -the school will support individual circumstances with an academic plan.
