### CAREER AWARENESS AND READINESS EVENT

APRIL 2024

Encourage your high school (grade 9-12) students to attend an aerospace and technology college and career event, where they can learn step-by-step how to effectively network, make connections in the industry, explore career opportunities along both academic and trade routes, and speak 1:1 with industry professionals.

This event is for all high school students, and space is for everyone. Our industry needs engineers, astronauts, welders, pipe-fitters, plumbers, teachers, lawyers, artists, entertainers, and more! ***Have students who are opting out of the college-route?*** Send them our way to speak with professionals who have done the same, and help them to land a job right out of high school or trade school! ***Have students who want to pursue a degree?*** Send them our way to speak with university students and professors on the best ways to achieve their academic goals and land a career in the industry.

Exact dates and registration information will be released in the near future. Space will be limited and registration is first come, first serve. **Attendance of this event includes complimentary admission into the Kennedy Space Center Visitor Complex.**
