Reopening Schools 2020 - 2021

Brevard Public Schools
Dr. Mark W. Mullins, Superintendent
Board Approved July 14, 2020
Organizational Priorities

• Maintain the health, safety, and welfare of our students and staff

• Provide quality learning opportunities and access while sustaining financial stability

• Provide the community supports and resources necessary to maintain the well-being and academic success of our students.
Academic Excellence

• Ensure every student has daily engagement with complex, grade-appropriate curriculum

• Provide students with certified, skilled teachers who hold high expectations for all learners

• Provide equitable supports in a safe learning environment for every student’s social, emotional, and behavioral development

• Ensure a quality education for all students to include the achievement of disadvantaged students by establishing innovative programs of student within schools, open enrollment opportunities to other schools, and other pathways to graduation

• Support early literacy through school readiness initiatives and provide all families access to literacy support for young children
Exceptional Workforce

• Fully staff all school and district positions with highly qualified employees

• Ensure all employees receive meaningful and relevant professional development, including understanding opportunities for growth

• Retain a highly developed, diverse, and skilled workforce that is engaged in serving every student with excellence as the standard

• Provide competitive compensation and benefits for all employees
Community Connection

• Ensure public awareness and trust of BPS to sustain support

• Expand stakeholder engagement to improve academic achievement

• Develop government-relations agenda that supports excellent education and strengthens district finances

• Improve external and internal customer service and satisfaction
Operational Sustainability

• Provide safe, healthy, and fully equipped working and learning environments

• Transport students safely, efficiently, and on time

• Incorporate sustainable financial and procurement practices in all financial processes and decisions
Equity in education means that each child has access to relevant and challenging academic experiences and educational resources necessary for success across race, gender, ethnicity, language, disability, family backgrounds and/or income. COVID-19 has further complicated and exacerbated social and educational inequities with its additional impact across other social systems such as healthcare, housing, and employment. As educators, communities, and policymakers work together to respond to the pandemic, equity must remain at the forefront of Brevard’s short, and long-term responses and supports.

“Without education he lives within the narrow, dark, and grimy walls of ignorance...Education on the other hand, means emancipation; it means light and liberty. It means the uplifting of the soul of man into the glorious light of truth, the light only by which men can be free.”
- Frederick Douglass, Blessings of Liberty and Education 1894

• Parents and Guardians – through portal and School Advisory Councils

• Teachers and Staff – through portal, specific teacher-type feedback, School Advisory Councils, and collaboration with union leaders

• Site Based Administrators – through portal, and specific survey to administrators

• Community Leaders – through portal, and School Advisory Councils
Any school re-entry policies should consider the following key principles:

• School policies must be **flexible** and nimble in responding to new information, and administrators must be willing to **refine approaches** when specific policies are not working.

• It is critically important to develop strategies that can be **revised and adapted depending** on the level of viral transmission in the school and throughout the community and done with close communication with state and/or local public health authorities and recognizing the differences between school districts, including urban, suburban, and rural districts.

• Policies should be practical, feasible, and appropriate for child and **adolescent’s developmental stage**.

• **Special considerations** and **accommodations** to account for the diversity of youth should be made, especially for our **vulnerable populations**, including those who are medically fragile, live in poverty, have developmental challenges, or have special health care needs or disabilities, with the goal of safe return to school.

• **No child or adolescents should be excluded from school** unless required in order to adhere to local public health mandates or because of unique medical needs. Pediatricians, families, and schools should partner together to collaboratively identify and develop accommodations, when needed.

• School policies should be guided by **supporting the overall health and well-being of all children, adolescents, their families, and their communities**. These policies should be consistently communicated in languages other than English, if needed, based on the languages spoken in the community, to avoid marginalization of parents/guardians who are of limited English proficiency or do not speak English at all.
With the above principles in mind, the AAP strongly advocates that all policy considerations for the coming school year should start with a goal of having students physically present in school. The importance of in-person learning is well-documented, and there is already evidence of the negative impacts on children because of school closures in the spring of 2020.

Lengthy time away from school and associated interruption of supportive services often results in social isolation, making it difficult for schools to identify and address important learning deficits as well as child and adolescent physical or sexual abuse, substance use, depression, and suicidal ideation.

This, in turn, places children and adolescents at considerable risk of morbidity and, in some cases, mortality. Beyond the educational impact and social impact of school closures, there has been substantial impact on food security and physical activity for children and families.
Additionally on 7/10/2020 AAP sent an additional press release including the following statement:

"Local school leaders, public health experts, educators and parents must be at the center of decisions about how and when to reopen schools, taking into account the spread of COVID-19 in their communities and the capacities of school districts to adapt safety protocols to make in-person learning safe and feasible. For instance, schools in areas with high levels of COVID-19 community spread should not be compelled to reopen against the judgment of local experts. A one-size-fits-all approach is not appropriate for return to school decisions".
Prior to Opening - Operational

- Extraneous furniture and clutter will be removed from classrooms to allow for more distancing
- Desks will be turned in the same direction, tables will be seated so that students are not facing each other
- Hallway traffic patterns will be modified to minimize face-to-face interaction
- Plexi-glass barriers will be placed, when appropriate, in offices and reception areas*
- School schedules will be designed to minimize congregation in communal areas to include cafeterias, gyms, courtyards, etc. School teams will also develop arrival and dismissal protocols to minimize interaction
- Water fountains will have signage restricting their use to the filling of water bottles or cups
- PPE, hand sanitizer, and additional cleaning products will be procured and onsite at each school*
- Bus drivers, cafeteria staff, and custodians will be trained in cleaning procedures and new protocols for increased frequency of cleaning

*Funded through CARES Act
Prior to Opening - Operational

• HVAC filter changes are in process*. Air conditioning will be running before and after building occupancy for additional air circulation.

• Transportation routes adjusted for no more than 2 per seat and other safety measures

• Policies, procedures, and practices reviewed to ensure they encourage students and staff to stay home when sick, eliminate visitors, and avoid caregivers from leaving their cars at drop-off and dismissal

• Adjustments to clinic spaces to allow for separation of students

• Development of professional development on protocols for faculty and staff to complete during orientation

• Development of videos and guidelines for students and parents with emphasis on the importance of hand washing

• Development of protocol on when to close classrooms, or schools and decision points on communication for active cases

• Staffing and training of Custodial Strike Team to amplify custodial efforts as needed*

*Funded through CARES Act
Recap of District Purchased Supplies

• Thermometers for each school and district site

• Disposable face masks for every school and bus—pediatric masks available at elementary schools

• Face shields for each teacher, instructional assistant, and bus drivers

• Hand sanitizer for all classrooms, instructional spaces, common areas, and transportation

• Plexi-glass for main counter areas

• Plexi-glass for school counselors and others who work one-on-one closely with others

• Cleaning products for every classroom space in addition to the supplies for school cleaning

• Misting fogger for every school and district site

• Funds for additional site-based purchases through CARES Act*

*Funded through CARES Act
Prior to Opening – Educational

• Utilization of Early Warning System data to target students who would benefit from additional summer instruction – development and execution of both virtual and in-person academic support prioritizing students who are below proficiency*

• Review of medically fragile students and the development of Individual Health Plans and procedures

• Assess students with disabilities' progress towards their IEP goals and plan for instructional opportunities

• Review and complete ongoing evaluations and re-evaluations

• Assessment of technology needs and gaps within schools – hardware and software*

• Creation of professional development for blended learning instructional experiences

• Additional school counselor and staff hours throughout the summer to support students and families*

• Support for students in transition throughout the summer to include meals, social worker support, additional supplies and provisions, and other essential supports for a successful start*

*Funded through CARES Act
Prior to Opening – Educational

- Review of social-emotional curriculum in supporting students with challenges exacerbated by COVID-19
- Trauma Informed/Compassion Fatigued training developed for school staff
- Modification of the BPS scheduling process to allow for technology use on day 1 for both diagnostic assessments and blended learning
- School Improvement Plan process to include the development of an additional academic support program for students who are struggling (e.g. tutoring, before or after school programs)*
- Curriculum plan and resource review for blended instruction with high quality instructional materials
- Small group assessments for industry certification, ACT, and EOC’s*
- Identify methods of acceleration through virtual, dual enrollment, and testing to consider early graduation options

*Funded through CARES Act
2020-EO-06: Further Guidance for Closing Achievement Gaps and Creating Safe Spaces for Learning
• **Assurance 1**: The district will assure that all brick and mortar schools open in August at least five days per week for all students

• **Assurance 2**: The district must provide the full array of services that are required by law, including in-person instruction, specialized instruction for students with IEP's and those from vulnerable populations, such as students from low-income families, students of migrant workers, students who are homeless, students with disabilities, students in foster care, and/or students who are English Language Learners

• **Assurance 3**: The district will provide robust progress monitoring to all students; tiered support must be provided to all students who are not making adequate progress. If a student is receiving instruction through innovate teaching methods fails to make adequate progress, the student must be provided additional support and the opportunity to transition to another teaching method
• **Assurance 4**: The district will work with IEP teams to determine needed services, including compensatory services for students with disabilities

• **Assurance 5**: The district will work with ELL Committees to identify English Language Learners who have regressed and determine if additional or supplemental English for Speakers of Other Languages services are needed

• **Assurance 6**: The district must share with the Department regularly progress monitoring data as defined by the Department

• **Assurance 7**: The district will collect reopening plans from each charter schools governing board for approval
Summary of the Commissioner’s Public K-12 Framework

Format
- Live synchronous or asynchronous education
- Ability to interact with teacher and peers

Content
- Same curriculum and instructional hours whether in-person or at home
- Must address equity for all types of learners: low-income, ESE, ELL and struggling students
- Must have a focus on narrowing achievement gaps

Progress
- Must maintain automated attendance records by day and hours of instruction
- Must have a system for monitoring daily engagements in every class
- Conduct progress monitoring
- Provide these results to FDOE
Elementary Options

- Full-Time In Person at School
  - DOE Required
- Full-Time Brevard Virtual School
- Part-Time IP/Part-Time BVS
- Full-Time eLearning from School @ Home
  - Pending DOE Approval
Brevard Public Schools’ eLearning program offers a safe, alternative extension of your elementary school. This educational option is robust and provides an equivalent experience to the traditional classroom. Children will learn and collaborate with their peers and teacher in a virtual platform. Educational excellence and high expectations remain through the eLearning option.
Parents

• Consider nine-week increments of eLearning instruction, unless it is not academically appropriate.
• Set up space in the home with supplies and materials.
• Post and enforce prescribed schedule provided by eLearning school. Students are expected to participate during the scheduled subject time.
• Assist your child with accessing online instruction.
• Monitor your child to ensure attendance and participation.
• Understand that eLearning requires flexibility and times of independent work during the school day.
• Download and become familiar with MICROSOFT TEAMS or ZOOM.

Teachers

• Deliver interactive, engaging, and standards-aligned eLearning instruction from the school site.
• Communicate weekly with parents and daily with students.
• Create lessons plans that are flexible and available for a substitute.
• Attend eLearning and school-based professional development.
• Adhere to school site schedule.
• Be intentional and explicit about timing, pacing, progress monitoring and expectations.
• Understand the school day is a mirror of traditional classroom setting to include core instruction and intervention with BPS adopted materials, pacing, sequence guides and standard Focus documents.
**Elementary e-Learning**

**Student Role**
- Follow the routine and eLearning schedule provided
- Work in a designated eLearning environment away from distractions
- Be an active learner
- Let your teacher know if you need help
- Complete all work independently or with teacher assistance

**Schools** will progress monitor students to ensure mastery of standards and to provide tiered support for students

Students will be expected to complete the progress monitoring diagnostic in a secure location 3 times a year

Students who are attending school via eLearning will have the opportunities for meal availability from school

Students will follow the same pacing of standards as a Brick and Mortar classroom
Elementary e-Learning

Elementary Survey
Parents have been provided a school specific survey on July 9, 2020 to determine level of interest in participating in the eLearning concept. This survey will be open until July 20, 2020.

Live teacher-guided online quality instruction that mirrors the exact school day delivered via either TEAMS or ZOOM

Provides an equivalent experience to the traditional classroom

Children will learn and collaborate with their peers and teacher in a virtual platform

Students will have supportive learning materials at home (i.e., textbooks) receive small group drive-in support therapy/support services (i.e., OT/PT, ELL, etc.)

* Must be FL DOE approved
Secondary Options

- Full-Time in Person at School  
  DOE Required

- Full-Time Brevard Virtual School

- Part-Time IP/Part-Time BVS

- Full or Part-Time Dual Enrollment  
  Qualifying HS Students

- eLearning from School @ Home  
  Pending DOE Approval

BPS Reopening Schools 2020 - 2021
Secondary Schools - Configuration

All Secondary Schools will operate on a Block Schedule for the 2020 – 2021 School Year

**Students**

- Enroll in four 90-minute classes per semester
- Take an additional class (8 v 7) for remediation or acceleration while minimizing daily clusters and transitions
- Students have decreased exposure with from 7 classes to 4 a day
- Provides for a smoother transition when distance learning becomes necessary with 4 classes vs 7
- Allows for extended class-time for classes that require more protocols such as CTE, Music, Science Labs and other hands on classes
- Students will need to be accustomed to the rigors of finishing a course in a semester

**Teachers**

- Instruct three 90-minute classes a day
- Additional planning time to support students on eLearning and plan for blended instruction
- Lessens teacher exposure from 6 classes a day to three classes
- Changes average total students from approximately 150 to 75 allowing for more in-depth understanding of IEP, 504, or other differentiation needs
- ESE Support Facilitation and Instructional Assistants rotate between fewer classes, more in-depth focus on course support
Secondary Schools - Configuration

Opportunities and Challenges

- School administration and custodians will need to manage fewer class transitions
- Less students in a space throughout the day, less shared materials
- Configuration provides opportunity to accelerate graduation allowing for more mid-year graduates

- Hurricane days have double the impact on instructional hours
- A single day absence is a greater impact to 135 hours of instruction or 67.5 in semester
- Professional Development required in structuring lessons and activities to maximize class time
- Advanced Placement testing scheduling
Secondary Schools – eLearning from School @ Home

All secondary students will be able to choose a full-time at home eLearning option. Students will participate in a standard school day with academic and attendance expectations that match their schedules.

Students
- Will be scheduled in the exact same manner as other students
- Students will select their option prior to the 1st day of school or upon enrollment
- Students may change their elected option in consultation with school leaders
- Students will be responsible for attendance, participation in class, required progress monitoring, and other course expectations – some activities may require students to complete the task in person (minimal)
- Students will continue to receive services through IEP, 504, or ELL plans. Some services may require some on-campus time depending on the student’s goals.

Teachers
- Will have both in-person and eLearning students on their class roster
- Teachers will take daily attendance for eLearning students and follow appropriate intervention plans once a student is absent for 3 days
- Students scheduled for eLearning will count towards class-size
- Within the 90-minute block, teachers will lead instructional activities for both groups of students
- Teachers may choose the method to provide live engagement with students on eLearning
- With an approved plan, schools may compensate teachers for tutoring or help sessions that are delivered either virtually or in-person for both in-person and eLearning students
Choosing eLearning or Virtual School Full-Time

eLearning refers to students who are a part of a class schedule at their school but engaging from home.

Virtual School refers to students participating in Brevard Virtual School.

**eLearning**

- Students maintain enrollment at their home school.
- Students will follow the traditional school day schedule for when they engage in coursework.
- Students will have daily live interaction with their teacher and their peers during their regularly scheduled class time.
- Students will continue to receive services according to their IEP, 504 Plan, or ELL Plan.
- Students will need to complete progress monitoring at their home school.
- Students may transfer from eLearning back to their home school.
- Students will use a combination of instructional resources provided by the teacher.

**Brevard Virtual School**

- Students will be enrolled at BVS as their school of record.
- Students may complete coursework during the hours most convenient for him/her, there are limited times where students are required to participate time certain.
- Students will not have daily live interaction with their teacher or peers.
- Some services for students can be provided via BVS, please check with BVS for options for students with special needs.
- Students can complete progress monitoring through BVS.
- Students may transfer from BVS back to their home school.
- Students will use the FLVS course materials delivered through Brevard teachers.
In School Guidelines – Health Screening

Students and staff should take their own temperature before reporting to school each day and stay home if above 100F or if experiencing other symptoms.

Parents are the first level of daily health checks. Parents are the most knowledgeable judge of their own child’s health as COVID has an incubation period in which symptoms may not be evident. Schools will have touchless thermometers available at each site for a second screening, when appropriate.

Teachers will have the option of using a touchless thermometer, following the guidelines established by the District, to screen students prior to entering the classroom.

Schools will identify students not equally supported in a self-assessment at home and develop a plan to screen those students upon arrival at school.

Students kept home by parents, or by school officials for health-related reasons will be considered excused.

Students who are home for a designated period, but otherwise asymptomatic will be supported to continue learning at home.

Students who are ill should prioritize their health - the school will support individual circumstances with an academic plan.

These guidelines may change depending on local, state, or federal recommendations.
School and parent partnerships is critical to ensuring that all students are properly supported, and that staff have the information they need to assist students.

All parents and legal guardians should verify that their child's school has accurate information for parent and emergency contact.

Parents and legal guardians are responsible to promptly pick up or properly arrange for the pick-up of a student sent home from the clinic.

All parents and legal guardians should carefully select emergency contacts for their child and ensure that the contact information for him/her is accurate.

All parents and legal guardians should provide complete and accurate medical information to the school.

Any parents or legal guardians leaving their children in the care of someone else for a short-term reason such as work or family emergency, should complete a loco-parentis form prior to leaving the child in the care of others.

All medications must be brought, in the original container, directly to the clinic by the parent or legal guardian.
Face Coverings and PPE
Cloth face coverings protect others if the wearer is infected with SARS CoV-2 and is not aware. Cloth masks may offer some level of protection for the wearer. Evidence continues to mount on the importance of universal face coverings in interrupting the spread of SARS-CoV-2. Although ideal, universal face covering use is not always possible in the school setting for many reasons. Some students, or staff, may be unable to safely wear a cloth face covering because of certain medical conditions (eg, developmental, respiratory, tactile aversion, or other conditions) or may be uncomfortable, making the consistent use of cloth face coverings throughout the day challenging.

For individuals who have difficulty with wearing a cloth face covering and it is not medically contraindicated to wear a face covering, behavior techniques and social skills stories (see resource section) can be used to assist in adapting to wearing a face covering. When developing policy regarding the use of cloth face coverings by students or school staff, school districts and health advisors should consider whether the use of cloth face coverings is developmentally appropriate and feasible and whether the policy can be instituted safely.

If not developmentally feasible, which may be the case for younger students, and cannot be done safely (eg, the face covering makes wearers touch their face more than they otherwise would), schools may choose to not require their use when physical distancing measures can be effectively implemented. School staff and older students (middle or high school) may be able to wear cloth face coverings safely and consistently and should be encouraged to do so. Children under 2 years and anyone who has trouble breathing or is unconscious, incapacitated, or otherwise unable to remove a face covering without assistance should not wear cloth face coverings.
In School Guidelines – Face Coverings

When social distancing* cannot be adhered to, it is **expected** that students and staff wear a face covering. The student dress code applies to face coverings and only the nose and mouth should be covered, not the full face.

*Social distancing is defined as 6 feet

In certain circumstances a mask may be **required** for a specific lesson or activity such as CTE labs or other vulnerable activities or areas.

For the safety of everyone on the bus, it is **expected** that all bus riders wear a face covering while on the bus.

Students who are sent to the clinic and exhibiting symptoms will be provided a mask to wear while awaiting parent pick up.

Face Shields will be available at each school for faculty members along with a robust supply of disposable masks for students or staff who need one.

School and transportation staff will nicely offer a mask to any student without one.

BPS recognizes that face coverings may not be appropriate for all individuals based on certain medical conditions.

---

These guidelines may change depending on local, state, or federal guidelines.

---

BPS Reopening Schools 2020 - 2021
Handwashing is one of the best ways to protect yourself and your family from getting sick (CDC).

All bathrooms will be cleaned and stocked multiple times throughout the day.

Students in an elementary setting will be taught proper handwashing and regularly scheduled for handwashing multiple times throughout the day.

Secondary students will be taught proper handwashing and be given ample time at class change and throughout the day for handwashing.

Students will use hand sanitizer upon entering and exiting a classroom.

Hand sanitizer will also be available in common spaces where there are not sinks such as gyms, cafeterias, and outdoor play areas.

These guidelines may change depending on local, state, or federal recommendations.
Transportation provides unique challenges for social distancing - parents and staff will need to work together to ensure a safe environment for riding the bus

- Parents must provide guidance to their children on appropriate social distancing at bus stops
- Students are expected to wear masks while on the bus - with the exception of students with documented medical or sensory conditions that would be adversely impacted by wearing a mask
- Students will use hand sanitizer upon entering and exiting the bus
- Students will be given an assigned seat. Students must sit in that assigned seat
- Siblings and those sharing a household will be seated together
- Students should allow appropriate distance between each other when entering and exiting the bus
- Seats will be wiped down between routes
- Windows will be open when the weather permits
- Misconduct on the bus will result in disciplinary action that may include suspension from the bus

These guidelines may change depending on local, state, or federal recommendations.
In School Guidelines - Food and Nutrition Services

School cafeterias are a vital component of the educational environment and essential to the health and well-being of all students

- All cafeteria staff will wear masks and gloves during preparation, and meal service
- Hand sanitizer stations will be placed outside cafeteria entrances
- Families are encouraged to use MealPayPlus.com for cashless transactions
- Touchpads will be removed, students will either scan an ID or verbally share their student number
- Serving lines have been modified to offer more safely pre-packaged items
- Serving lines have been rearranged for consideration of social distancing
- School Administration and the Food Services Team are establishing additional locations for meal service and identifying seating configurations that minimize risk
- School cafeterias will continue to provide grab and go meal packages in addition to items on the serving lines
- All cafeteria tables, serving lines, and high touch points will be cleaned in between lunches
- Students on eLearning will have limited access to meal service

*These guidelines may change depending on local, state, or federal recommendations*
The school clinic serves a pivotal role bridging health care and education

- Students and staff who are ill should stay home
- Parents should discuss any health concerns with clinic staff at their child's school
- Temperatures will be taken upon entering the clinic
- If the temperature is over 100F, parent/guardian will be notified the student is too ill to remain in school
- If students with symptoms associated with COVID-19 (loss of taste and/or smell, serious headache, nausea, diarrhea) come to the school, they will be sent to the health clinic for evaluation
- While waiting for parent/guardian, the student will be given a face mask and be socially isolated
- Each school will identify a location for ill students to wait for parent/guardian pick up
- Custodial staff will be notified when that space has been vacated, so the room can be sanitized
- Clinic areas will be cleaned throughout the day

These guidelines may change depending on local, state, or federal recommendations
All custodians will be trained and monitored in utilizing best practices for cleanliness and for disinfecting surfaces

Every classrooms will be thoroughly cleaned, to include ALL surfaces at least once a day. Schools will develop plans for in-between classes

Bathrooms and other common spaces will be cleaned multiple times each day

All cafeteria tables will be cleaned in between student use

The Custodial Strike Team* will be deployed when a school has a positive case, is significantly short-handed, or has a unique event requiring additional support

Cleaning for extra-curricular and after school programs will be coordinated at the school site

Each school will receive a liquid-disinfectant misting machine*. It is designed to quickly move from room-to-room and broadcast/spray through a hand-held wand. It is for both preventative cleaning and deep cleaning

These guidelines may change depending on local, state, or federal recommendations
In School Guidelines – Academic and Social Emotional Learning

• All students will be assessed within the first month of school to determine strengths and weaknesses in content areas, skill attainment, behavioral expectations, and readiness in the event distance learning is necessary

• Each teacher will integrate digital tools into their courses to ensure that all students are regularly accessing and utilizing high quality digital materials in addition to traditional instructional materials

• Teachers will work in a blended format to minimize challenges when individual students, whole classes, or the entire school must pivot to eLearning or distance learning for a short or extended period

• Teachers and staff who provided services to students with disabilities will work with individual students, their families, district support teams, and school administration to meet IEP goals and related services, to the greatest extent possible, in the event distance learning is necessary

• In the event distance learning is required, students who need devices or internet access will be provided the tools necessary to succeed

These guidelines may change depending on local, state, or federal recommendations
In School Guidelines – Academic and Social Emotional Learning

• All students will receive the required mental health curriculum and be supported through a social emotional framework

• Each school will implement an academic support plan to provide additional instruction through tutoring, before or after school activities, or enrichment embedded in the school day

• Each school will develop a plan to provide additional support for students who are temporarily on distance learning

• Each teacher will utilize FOCUS to regularly update parents and students on academic performance

• Secondary students will continue to have access to programs that accelerate their learning such as Career and Technical Education, Advanced Placement, International Baccalaureate, Cambridge, Early College, Virtual School, Credit Acceleration Programs, and ACCEL diploma options

*These guidelines may change depending on local, state, or federal recommendations*
Limitations to Academic Programs and Extracurricular Activities

These guidelines will be reconsidered throughout the year based on prevailing conditions

- School Field Trips will not be authorized
- Playground equipment use is prohibited
- Chorus programs or other lessons that involve singing must sing outdoors
- Physical education classes will not "dress-out". Students should dress appropriately for activity if scheduled for PE
- In courses with labs and shared hands-on materials students will be provided supplies to maintain cleanliness in between use
- Students will be encouraged to bring their own water bottles and will be prohibited from sharing them
- Schools should not convene assemblies
- Athletic and extra-curricular activities will continue to follow the Return to Activity guidelines
- Parent nights such as Open House, Parent Conferences, and other events should continue virtually

*These guidelines may change depending on local, state, or federal recommendations*
These guidelines will be reconsidered throughout the year based on prevailing conditions

Although BPS recognizes the invaluable role volunteers and parents play in the educational process, student and staff safety require the limitation of non-essential people on campus.

- Visitors in schools are limited to parents or legal guardians:
  - registering students for school
  - attending requested school meetings
  - checking in or out students
- Authorized visitors are expected to wear masks when social distancing cannot be maintained, or upon request of the school employees
- Non-essential visitors and volunteers will not be permitted on school campuses to include walking students to class, eating lunch with students, or attending classroom events or celebrations
- Parents may not drop-off items for student pick-up that are not medically or academically required
- Contracted service providers will be required to complete a self-screener prior to being allowed on campus and they must adhere to all school health guidelines

These guidelines may change depending on local, state, or federal recommendations
Students or Staff Exposed to COVID-19

Families and staff should notify their school/department if they have been exposed to COVID-19 and are quarantined, or if a family member has been diagnosed with or presumed to have COVID-19 and/or is being isolated.

Staff and students who live with someone with diagnosed or presumed COVID-19 *should self-quarantine at home for 14 days as directed by the DOH.

Staff or students who travel out of state, should review prevailing CDC guidelines on whether they will need to self-quarantine upon return.

Students whose absence is due to being directed to quarantine or isolate will be coded as a Doctor's excused absence.

Employees will be able to apply for Covid-19 leave or, if that has already been used, to use their personal/sick leave unless the Covid-19 illness has been determined to be work-related, in which case a Workers' Compensation claim may be filed (see slide 52).

* a case is considered "presumed" when an individual has had contact to a case and is exhibiting symptoms.

These guidelines may change depending on local, state, or federal recommendations.
Students or Staff Diagnosed with COVID-19

Staff and students (parents or legal guardian) must notify their school if they have been diagnosed with COVID-19

The BPS Response Team, in coordination with DOH, will close buildings to clean, disinfect, and contact trace on a case by case basis

Communicate with staff, parents, and students of possible exposure while maintaining confidentiality as required by ADA and HIPAA

Custodial Strike Team will be activated to support the cleaning of the facility

The BPS Response Team in coordination with the Brevard DOH, will determine when students and staff should return to schools and what additional steps are needed for the school community

Provide a continuous instructional plan for all impacted students, provide services for students with disabilities, and activate feeding plan

These guidelines may change depending on local, state, or federal recommendations
Students or Staff Returning to BPS Sites

To protect the safety and health of students and staff, school officials will send home, or deny entry, any student, visitor or staff member with any symptoms of illness. For symptoms consistent with COVID-19, please reference the exclusion criteria below to determine when individuals may return to the school. Symptoms of COVID-19 may include but are not limited to: fever (100.4°F or higher), cough, shortness of breath, fatigue, muscle or body aches, headache, loss of taste or smell, sore throat, congestion, runny nose, nausea, vomiting and diarrhea.

**Individual has been clinically evaluated**

**Individual has been clinically evaluated**

Received laboratory test for COVID-19

COVID-19 diagnosis without lab test

Recommend contacting the health department or medical provider to get tested.

Individual stays home until they have had no fever for at least 3 days AND improvement of other symptoms AND at least 10 days have passed since your symptoms first appeared.

Siblings and household members also stay home for 14 days

**Individual has not been clinically evaluated**

If experiencing symptoms of COVID-19 recommend contacting the health department or medical provider to get tested.

Individual stays home until they have had no fever for at least 3 days AND improvement of other symptoms AND at least 10 days have passed since your symptoms first appeared.

Siblings and household members also stay home for 14 days

*These guidelines may change depending on local, state, or federal recommendations*
Clinic staff will instruct and enforce that anyone (students, staff, and visitors) who is sick (any fever, respiratory, or gastrointestinal symptoms) or believe they might have COVID-19 should stay home and separate themselves from other people in the home as much as possible.

They should be excluded from school until they can answer YES to all the following questions:

- Has it been at least 10 days since you first had symptoms?
- Have you been without fever for three days (72 hours) without taking any medicine for fever?
- Has it been three days (72 hours) since your symptoms have improved?
A plan addressing the needs for students with special healthcare considerations that place them at higher risk for medical difficulties related to exposure to COVID-19 has been developed and will be implemented. These guidelines may change depending on local, state, or federal recommendations.

All teachers and other staff members who may be responsible for implementing a student’s Individual Health Plan will be made aware that the student has a plan and fully comply with it when the school year begins. Teachers must fully implement Individual Health Plans for eligible students.

Medically vulnerable students may also have a 504 Plan, an approved Chronic Health condition, or an IEP.

Parents should work closely with the school clinic, school staff, and Department of Health officials to ensure that schools have proper documentation of all medical conditions.
School Closure

The Response Team will review each situation to determine the decisions will be made based upon both health and operational concerns, as well as past practice in mitigating infectious disease.

When a school is no longer able to safely function due to employee absence and the inability to fill those positions, a school may be subject to a temporary school closure.

Schools whose enrollments fall below minimum capacity to run efficiently and effectively may be combined to offer students continuity of services.

Day-to-day decisions for schools to remain open or to close are local decisions made in collaboration with the Department of Health.

These guidelines may change depending on local, state, or federal recommendations.
In the event a staff member is exposed to Covid-19, the employee should follow the CDC guidance as listed below. The caveat is if the employee lives with someone diagnosed with or presumed to have COVID-19, in which case the employee should self-quarantine at home for 14 days as directed by the DOH. As of today, the recommendations for staff who are contacts to positive or presumptive cases that are not close familial relationships are in the chart below.

**Do**
- Take your temperature before you report to work
- Wear a face covering at all times
- Practice social distancing in the workplace as work duties permit

**Don't**
- Stay at work if you become sick
- Share headsets or objects used near the face
- Congregate in the break room or other crowded places

*These guidelines may change depending on local, state, or federal recommendations*
In the case from the previous slide where an employee lives with someone who has been diagnosed with Covid-19 or is presumed to have Covid-19, the employee should do the following:

1. Notify **supervisor**
2. Work with his/her department or school secretary and the Office of Employee Leave
3. Work with supervisor to determine if daily work assignments may be completed efficiently and effectively through remote work
4. If so, as potentially in the case of a teacher (for illustrative purposes) who is a contact to a case with a close familial relationship (i.e. lives with the individual diagnosed with Covid-19) remote work may be arranged
5. If daily work assignments cannot be completed efficiently and effectively through remote work, the employee will work with his/her school or department secretary to determine appropriate leave to be taken which may include Emergency Sick Leave under the FFCRA, employee accrued leave, or illness in the line of duty leave (if applicable) which will be described in the next slide.

*These guidelines may change depending on local, state, or federal recommendations*
Currently available considerations for leave for staff who become ill with COVID-19. Click for the FFCRA Decision Tree.

10 sick days – Families First Coronavirus Response Act (FFCRA): All employees are eligible to receive these days if they have or suspect they have COVID-19.

10 sick days - Illness/Injury-in-the-line-of-duty leave: Awarded to all employees if the illness (COVID-19) can be shown to be work-related.

Total of 20 sick days an employee currently has available to him/her if diagnosed with COVID-19 and if shown to be a work-related illness.

If suspected to be work-related would be reported as a Workers' Compensation claim and the claim would be investigated.

If claim is accepted as work-related, once the 20 days have been exhausted, the employee will receive 66.66% up to a maximum of $971 per week of weekly pay through Workers' Compensation. The balance of the 33.33% is paid via the employee's earned sick leave.

These guidelines may change depending on local, state, or federal recommendations.
School Safety Guidelines

School Resource Officers and Specialists are committed to keeping staff and students safe during the pandemic while ensuring compliance with expectations from the Office of Safe Schools

- Emergency drills must be completed per Florida law in the 2020-21 school year. At this time, no exceptions have been made with regards to suspension of drills required by law.
- Recommend discussion and simulated movement to identified safe places during lockdown scenarios to ensure social distancing. Staff will discuss with students what is expected of them during a lockdown and show them the safe place and verbally discuss what will be expected in-line with our General Emergency Procedures. This will be carried out in an age appropriate manner with your student. The importance is the process and knowing what to do during an emergency.
- Evacuations drills will be conducted with consideration of social distancing guidelines in-line with other COVID-19 safe practices. Students will maintain distancing during evacuation and assembly areas to the extent possible.
- The Office of Safe Schools may adjust emergency drill scenarios for social distancing considerations or spikes in COVID-19. Our office will respond to any directives or recommendations if received.
- SRO's and Specialists will practice social distancing unless required during enforcement or safety intervention purposes
- School safety personnel are expected to continue their typical roles and responsibilities
Brevard After School; Before and After School programs will be open when schools are open.

Follow the same school guidelines to include but not limited to handwashing and cleaning protocols.

Develop a staggered entry plan for drop off and pick up of students.

Students will keep backpacks and personal items with them.

Students will be participating in small groups activities following social distancing guidelines.

School will limit enrollment based upon safety and room capacity.

When social distancing* cannot be adhered to, it is expected that students and staff wear a face covering.

*Social distancing is defined as 6 feet.

These guidelines may change depending on local, state, or federal recommendations.
Information and Communications

All reopening related information can be accessed from the district’s COVID-19 response page at www.brevardschools.org/COVID-19.

- Reopening plan
- Frequently Asked Questions
- Informational facts sheets, links, and videos

School and district communications are delivered via email and text messages and posted to our social media pages.

- Make sure contact information is current with your school and use your mobile # as your primary phone to receive text messages.
Principal Check-List

- Develop a registration process that limits direct connect and the gathering of large of groups of people
- Designate an isolation room to support clinic programs in social distancing
- Ensure teachers, staff, and substitutes are trained in procedures and protocols related to COVID-19
- Plan for the replenishment of initial supplies and PPE
- Plan for classroom cleaning protocol when classes rotate students
- Plan for hallway movement patterns that minimize face to face contact
- Ensure that all custodians have completed all necessary training in protocols for infection control measures
- Place posters with COVID-19 educational materials in strategic areas such as front office, restrooms, cafeteria, gyms, and hallways prior to the start of school
- Verify that each classroom is staged with maximum distance between student desks and that rooms are free of clutter
- Ensure that a process is in place for all key personnel to have accurate parent contact information
- Review arrival and dismissal procedures and adjust as necessary to support social distancing
- Ensure all cafeteria operations are following expected protocols outlined by Food and Nutrition Services
- Plan for family engagement through virtual events
BPS Reopening Task Force

- Dr. Dawn Bronstein, Manager - Educational Technology
- Jane Cline, Assistant Superintendent - Elementary Leading and Learning
- Dr. Karyle Green, Director - Professional Standards/Labor Relations
- Sue Hann, Assistant Superintendent – Facilities Services
- Maureen Kelly RN MSN, Assistant Community Health Nursing Director - Florida Department of Health in Brevard
- Bill Macheras, Assistant Director – Athletics and Activities
- Dr. Michael Miller, Director - Transportation
- Christine Moore, Assistant Superintendent - Student Services
- Lt. Brian Neal, Brevard County Sheriff's Office - District Security
- Jim Powers, Manager - Environmental Health and Safety
- Dawn Richer, Manager – Procurement and Distribution Services
- Patty Seibert RN BSN, Executive Community Health Nursing Director - Florida Department of Health in Brevard
- Dr. Stephanie Soliven, Assistant Superintendent - Secondary Leading and Learning
- Kevin Thornton, Director – Food Service
