

GARMENT CARE INSTRUCTIONS

Follow instructions on the care label & read on for additional tips!

THE FIRST WASH is the most important!

- Do not exceed temperatures recommended on the care label.
- Warm water is recommended for the 1st wash and then cold water for all subsequent washes.
- Each garment should be washed separately (i.e. wash shell by itself, then skirt, etc...)
- Use a mild detergent, **without** fabric softener. Tide is recommended. Do not use bleach.

If the initial washing instructions are not followed, the colors may bleed onto one another. If this happens, wash the garment **AGAIN** (before drying), following the instructions above.

ALWAYS remove the garment promptly from the washer once the cycle is completed.

- Leaving the garment in the washer for prolonged periods of time can cause the fabrics to bleed and/or leave unsightly wrinkles in the garment.

DO NOT machine dry the uniform.

- Once the uniform has been washed, immediately hang it up to dry.

DO NOT dry clean the uniform.

- Dry cleaning can yellow the uniform or leave an unsightly sheen. Dry cleaning also causes tackle twill lettering to fade, bubble, or stiffen.

NEVER use fabric softeners

- Fabric softeners block the soil release properties (Visa treatment) and can cause dirt and stains to resist removal.

For the following fabrics: **CELEBRATION, SEQUIN & SEQUIN TRIM**, follow instructions below for "Care Label", however, **USE COLD WATER** for all washes.
