

Dear Parents, Guardians, & Families,

Over the past few months, Brevard Public Schools has purchased and piloted the ReaXium School Bus Ridership program for implementation for the upcoming SY 2022-2023. All buses have been outfitted with ridership tablets and GPS units.

By implementing this new program District Transportation and school administrators will be able to improve the safety, security, visibility, and communications of school bus transportation by staying connected to everyone involved.

Your bus rider(s) will be provided a district-issued bus badge with a barcode at your registration day unless they are provided their school ID at registration.

Bus riders must have their badges readily available to be scanned while boarding and exiting the bus to improve load times. Please assist in making sure your bus rider has their badge with them every day.

If preferred, the barcode can be accessed through the Brevard Focus App. Please follow these instructions to access the barcode and place on student phone:

1. Download Brevard Focus App
2. Log in using your student's district email address: (i.e. studentid@brevardschools.org)
3. Log in to Microsoft using your student's district email address (i.e. studentid@st.brevardschools.org)
4. Enter Password
5. Click on ☰
6. Click on Virtual ID Badge

Training materials have been prepared to introduce student bus riders as to what to expect when they board their buses and how this process will work. This material can be accessed at the following link: [Riders Training](#)

Additional information is available on the [Transportation Homepage](#).
